

## LINE BLENDS – 1-2012

Used current [cone 6 glazes](#) at the SC Mountains Art Center Ceramics Facility.

Students in this assignment did Q & D (Quick & Dirty) line blend tests, volumetrically. One student added a measured quantity of a prepared stain to various glazes.

We try to keep all our glazes at a density of 1.45 gm/cc. And we used a small volume cup to measure and make our small quantity batches.

White:Opalescent Green
